

Mimer SoftRadio

Readymade kits with radio and Mimer Network Interface

We deliver the kits built to your needs. The cabinet size, radio type, 230VAC, 12VDC, battery backup etc all is changeable. Below are two examples of kits either for rack mount or wall mount.

19"-rack mounting, in this case with Mimer Network Interface, Motorola GM380 and Power Supply. Two rack units high.

In this example with two Tetra radios and two Network Interfaces in each rack unit.

This concept is perfect for alarm centrals or others that need to stack many radios for different systems or talk groups.

Wall mount cabinet made for mounting in rough areas with Mimer Network Interface, Motorola GM380 and Power Supply.
300x400x210mm

Ideal for installations where you have only one or a few radios.

We have also, in some cases, built larger installations with many radios.

In this case it's 20 radios and 20 Network Interfaces in one rack. Power and UPS at the bottom and LAN switches at the top.
